

Control Description Writing

Preparation:

For each exercise station there is a map with a course drawn on. Place one map beside each exercise station.

Give out a pen and an answer sheet to each person.

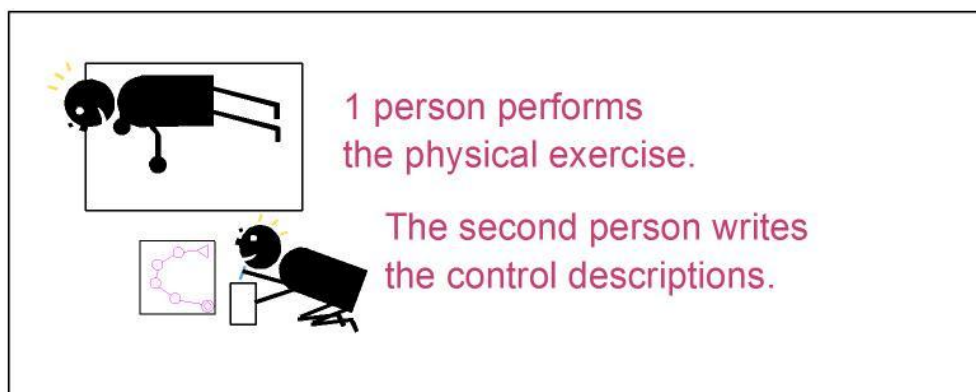

Diagram 1

How it works:

Person 1 does the exercise for the prescribed period of time (e.g. 45 seconds). Whilst person 1 is performing the exercise the second person looks at the maps and writes the appropriate number by the appropriate control description on the answer sheet. Some are very simple however some courses have control points with similar control descriptions. Hopefully this will make people think. The aim is to get as many matches as possible within the 45 seconds.

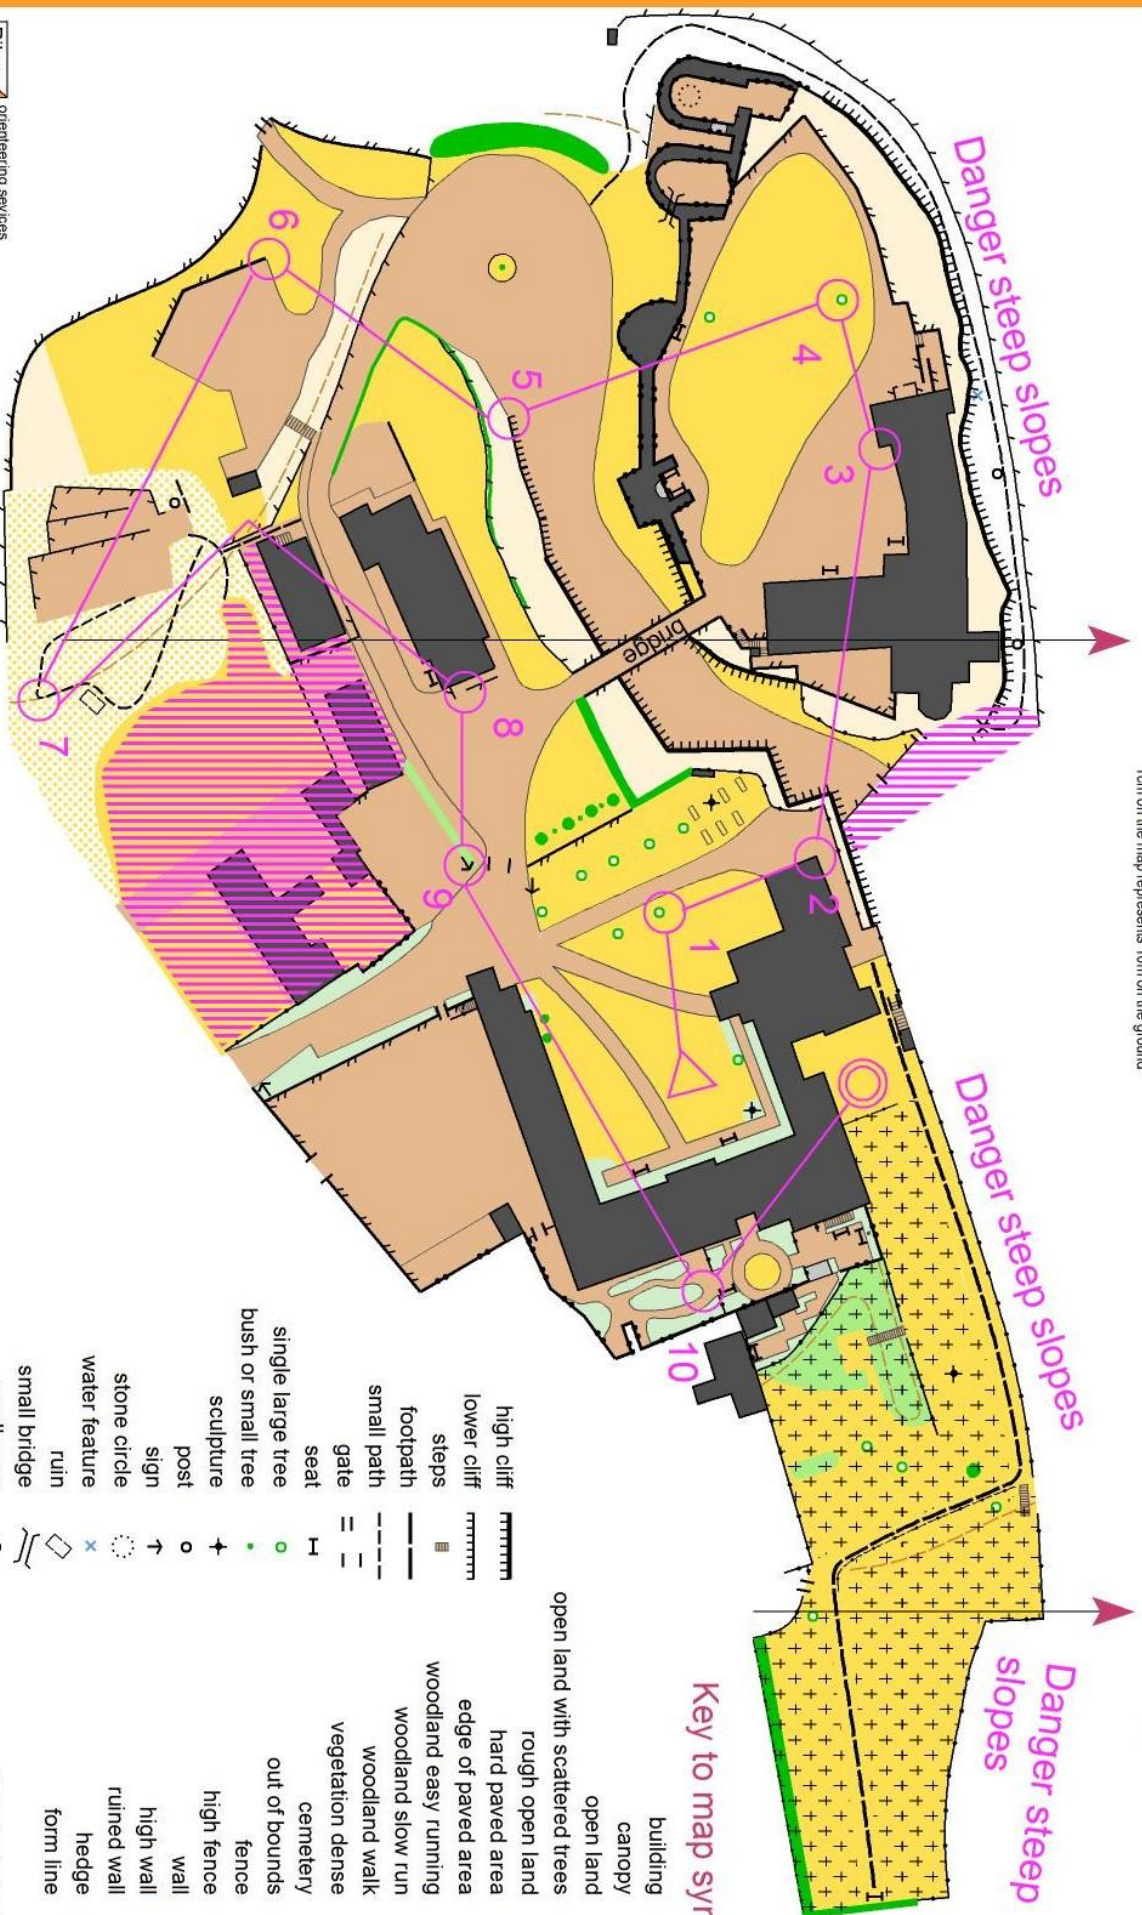

At the end of the circuit training session the coach can give out the solutions sheets and participants can work out how many they have got right.
