

## Map Jigsaws

### Preparation:

For each exercise station laminate and then cut up a map. Place the pieces to make a complete map at each exercise station.

**Diagram 1**

### How it works:

Person 1 does the exercise for the prescribed period of time (e.g. 45 seconds). Whilst person 1 is performing the exercise the second person attempts to complete the jigsaw. After their attempt they should mix of the pieces for the next person. Cutting up the maps into 10 pieces usually works well. However consider your group and what will work best for them.

At the end of the circuit training session the person who completed the most number of jigsaws is the winner.

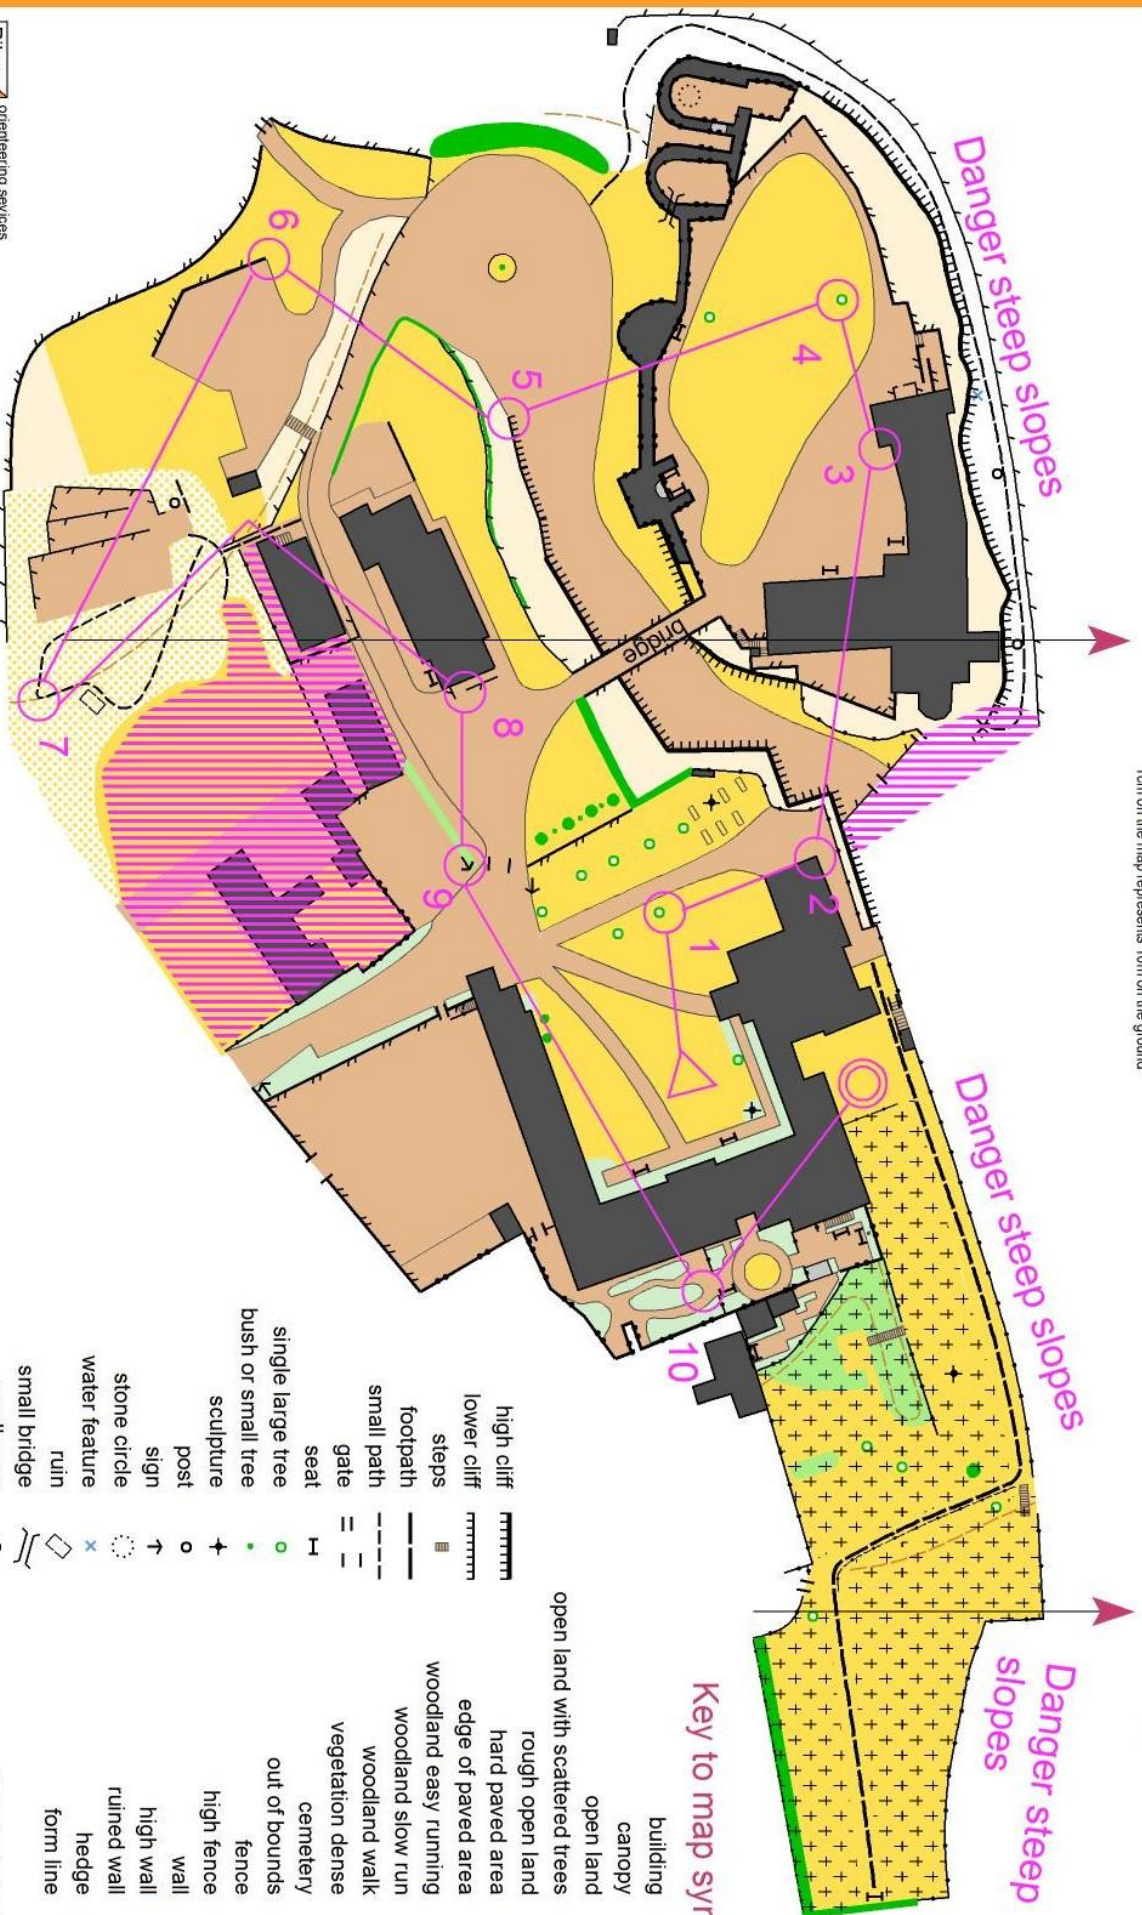

Use whatever maps you like, you could also use non orienteering maps or even just photographs. However if it easier, just cut up the ones from the control description writing activity (these are included below).
